DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C.

121:

- I. Claim 1, drawn to 13, classified in class 375, subclass 261.
- II. Claim 14, classified in class 330, subclass 251.

The inventions are distinct, each from the other because of the following reasons:

Inventions group I and group II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case claims 1-13 are related with a method of receiving a communication signal which belong to class 375, subclass 261, and claim 14 is related with a method of driving a power switch transistor which belong to class 330, subclass 251.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

A telephone call was made to Mr. William E. Winters on August 19, 2004 to request an oral election to the above restriction requirement, but did not result in an election being made.

Art Unit: 2631

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
